

Travel Booking Website Website Task 5

Task Description:

Your task is to develop a web application for a travel booking website. The website should allow users to search for destinations, view available travel options, make bookings, and manage their bookings. The goal is to create a user-friendly and visually appealing platform that provides a seamless travel booking experience.

Requirements:

Homepage:

Design an attractive homepage that showcases popular destinations, deals, and featured travel packages.

Include a search form where users can enter their preferred destination, travel dates, and other relevant details.

Display enticing images and brief descriptions of popular destinations.

Destination Listings:

Implement a destination listing page where users can view a wide range of travel destinations.

Include filters to allow users to refine their search based on factors such as location, price range, or activity type.

Display destination cards with images, brief descriptions, and starting prices.

Package Details:

Create a detailed page for each travel package or destination.

Include information about the itinerary, accommodation options, transportation, activities, and pricing.

Provide an option for users to select package variations (e.g., different accommodation types, add-on activities).

Booking Process:

Develop a user-friendly booking process that guides users through the steps of selecting a package, entering traveler information, and making a payment.

Include a form for users to input their personal details, such as names, contact information, and any specific requirements.

Implement a secure payment gateway to process payments for bookings.

User Account

Create a user authentication system that allows users to create accounts and login.

Provide users with a dashboard where they can view and manage their bookings, including the ability to cancel or modify bookings.

Store user information securely and ensure privacy and data protection.

Reviews and Ratings:

Allow users to leave reviews and ratings for destinations or travel packages they have booked.

Display reviews and ratings on relevant pages to provide social proof and help users make informed decisions.

Responsive Design:

Ensure the website is fully responsive and optimized for various devices and screen sizes.

Implement a mobile-friendly layout to cater to users browsing on smartphones and tablets. After completing the task, **you need to copy the code and convert it into a PDF file and take screenshots of the output.**

Technical Requirements:

- To complete this task, you should have a basic understanding of **HTML and CSS**. You should be able to use HTML tags to structure the content of the page, and CSS to add style and layout to the elements.
- **You can use Internal Styling/External Styling.**
- You should also know how to take screenshots and convert code to a PDF file.

Task Steps:

- Open a new file in a code editor and save it with an appropriate name, such as "communities.html."
- Create the basic structure of an HTML document by adding your code.
- Add the necessary HTML elements to create the structure of the page.
- Add the necessary CSS styles inside the style tag in the head section to style the HTML elements.

Task Submission Steps:

- Once you finish the task, **please copy the code and convert it into a PDF file.** Additionally, **please take screenshots of the outputs.**
- Next, **create a folder where you can upload the PDF file of your code and screenshots of the outputs.** Once you have uploaded these files, **convert the folder into a zip file and submit it using the given Google Form link for task submission.**

Task Submission Deadline:

- The deadline of task submission will be **Tuesday 23-5-2023 till 5:00 pm.**
